ATMDH / OAMT

Andean Transit Migration Data Hub

Hub de Datos de Migración de Tránsito Andina

Visual identity guidelines

Count the crossing, never the person.

Contar el cruce, nunca a la persona.

Version 1.0 · October 2026
Andean Transit Migration Data Hub (ATMDH / OAMT)
Departmental Youth Council of Santa Cruz, Bolivia · Asociación Juvenil Bookcubers

One crossing, twelve cells, and a protected one

The Hub counts people who cross the central Andean corridor between Peru and Bolivia, and it is built so that nobody can be followed. The symbol says both things at once. It is a **stepped diamond**, the form that recurs in Andean textiles, and it echoes the **chakana**, the stepped cross whose name is usually translated as *bridge*.

- **Lago, left of the axis.** The Peruvian side of the corridor.
- **Noche, the axis and the right side.** The Bolivian side, and the corridor that runs through both.
- **The ochre ring.** Desaguadero: one bridge, two municipalities, the only point where the corridor is literally a single place.
- **The hollow cell.** A protected cell, one with fewer than ten people. It is drawn so the reader can see that it exists and cannot be shown. It is never drawn as zero and never left out.
- **Twelve cells.** One for each node of the Hub, around a center that stays open.
- **The open dot, top left.** A place held for the next country. It is not a node and it is not counted: it marks that the diamond can grow.

> **The name of the symbol is “El Cruce”, the crossing.**
> It is the unit the Hub counts. The person who crosses is never the unit.

How the name is written

ATMDH / OAMT is the full signature: **ATMDH** in English (Andean Transit Migration Data Hub) and **OAMT** in Spanish. In running text use “the Hub”, “el Hub” or “ATMDH”. Spanish descriptor: *Hub de Datos de Migración de Tránsito Andina*.

Signature line

Count the crossing, never the person. / *Contar el cruce, nunca a la persona.* It is optional. Use it on covers, social cards and presentation closings, not next to the logo in small spaces.

2 · LOGO VERSIONS

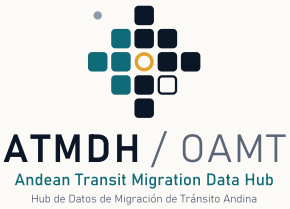

Pick the lockup by the space you have

Horizontal, full color. Default for light backgrounds. File: ATMDH_logo_horizontal_color

Horizontal, reversed. For Noche and photographs with a dark panel. File: ATMDH_logo_horizontal_reversed

Stacked. Covers, posters, square profile slots. File: ATMDH_logo_stacked_color / _reversed

Symbol only. Use when the name already appears nearby, or below 180 px wide. File: ATMDH_symbol_color / _reversed

One color, dark. Stamps, fax, black and white print. File: ATMDH_logo_*_mono-dark

One color, light. Over a single dark color or image. File: ATMDH_logo_*_mono-light

App icon and favicon

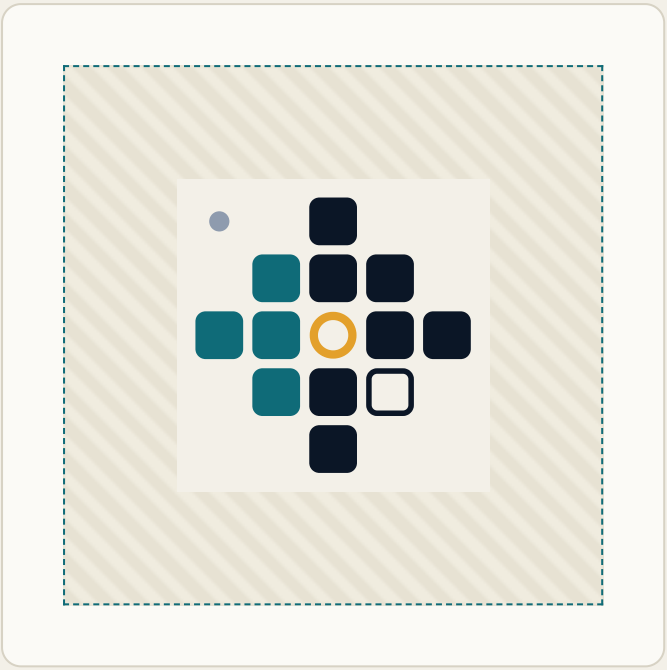

The symbol, reversed, on a Noche rounded square with 21% of padding. Files: ATMDH_app_icon_1024 and ATMDH_app_icon_180, plus favicon.svg for the website.

Which file for what

YOU NEED	USE
Slide, document, letterhead on white or Hielo	ATMDH_logo_horizontal_color.png
Social post, banner, dark slide	ATMDH_logo_horizontal_reversed.png or ATMDH_social_card_1200x630.png
Profile picture, square slot	ATMDH_app_icon_1024.png
Print that must be one color	ATMDH_logo_*_mono-dark.png
Web, large print, anything that must stay sharp	The matching .svg in the same kit

3 · CLEAR SPACE AND MINIMUM SIZE

Give the symbol room to breathe

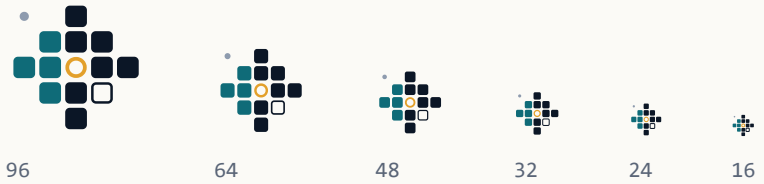

Clear space

Keep **one cell** of the symbol free on every side, about 17% of its width. For the lockups, measure that cell from the symbol and apply it to the whole block. Nothing enters the shaded area: no text, no edge of the page, no other logo.

Minimum size

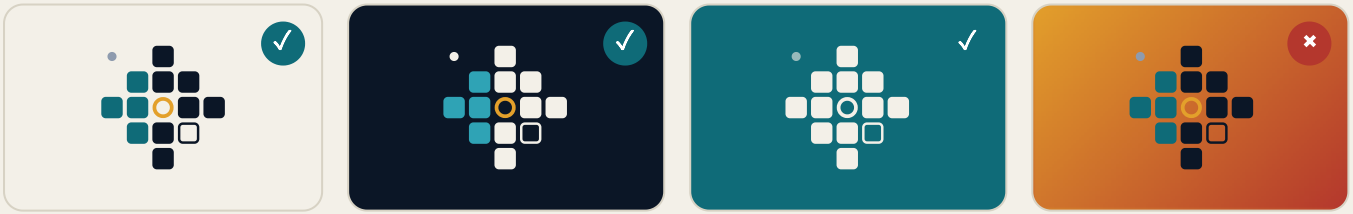

VERSION	SCREEN	PRINT
Symbol	16 px	5 mm
Stacked	140 px wide	35 mm
Horizontal	180 px wide	45 mm

The symbol at small sizes

Below 24 px the hollow cell reads as a lighter square. That is still correct.

Backgrounds

Full color on Hielo or white. Reversed on Noche. One-color light on Lago or other dark brand colors. Never on a busy photograph or a saturated gradient: put a Noche panel under it.

4 · COLOR

Night, ice, lake, and one ring of ochre

Four colors. Noche and Hielo do most of the work. Lago marks the Peruvian side and the secondary voice. Ocre appears once per layout: the ring, a highlight, a number that matters. If a layout has ochre in three places, remove two.

Noche andina
#0B1626
RGB 11, 22, 38
Primary. Wordmark, Bolivia-side cells, dark backgrounds, header.
about 55%

Hielo
#F3F0E8
RGB 243, 240, 232
Ground. Pages, cards, reversed wordmark.
about 30%

Lago Titicaca
#0F6B78
RGB 15, 107, 120
Secondary. Peru-side cells, subtitles, links.
about 10%

Ocre del altiplano
#E3A02B
RGB 227, 160, 43
Accent. The ring and one highlight per layout.
5% at most

Contrast, checked

PAIR	RATIO	WCAG	USE
Aa Noche on Hielo	15.9 : 1	AAA	Body text, wordmark, headings
Aa Lago on Hielo	5.4 : 1	AA	Subtitle, links, Peru-side cells
Aa Niebla on Hielo	5.2 : 1	AA	Secondary text
Aa Hielo on Noche	15.9 : 1	AAA	Reversed wordmark and text
Aa Ocre on Noche	8.1 : 1	AAA	Accent ring, highlights on dark
Aa Lago claro on Noche	6.1 : 1	AA	Peru-side cells on dark
Aa Ocre on Hielo	2.0 : 1	graphic only	Graphic only, never for text

Neutrals

Niebla
#5A6577
Secondary text on light.

Niebla clara
#A9B4C4
Secondary text on dark.

Lago claro
#2FA3B5
Peru-side cells on dark.

Lago hielo
#7FCBD8
Subtitle on dark.

Charts keep their own palette.
The dashboard charts use a separate, validated data palette so that categories stay distinguishable. Brand colors belong to the frame around the data: header, buttons, page, covers.

5 · TYPOGRAPHY

One family, two weights, tabular numbers

ATMDH

Bahnschrift SemiBold. Wordmark, titles, section labels. Wordmark tracking +7%.

Recorded events by municipality and month

Bahnschrift Regular. Subtitles, body text, interface.

3.140 1.354.441 85.000 n<10

Numbers use tabular figures so columns line up. The suppression marker is always written **n<10**.

Fallback

Bahnschrift ships with Windows 10 and 11. Where it is missing, use **Segoe UI**, then the system sans-serif. The logo files already carry the wordmark as outlines, so they never depend on the font. The website uses the system font stack on purpose, so that it loads offline with no remote fonts.

Writing

- Say **“recorded events”**, never “population” or “number of migrants”.
- Say **“people who cross”** or **“people in transit”**. Avoid “flows” as a subject without people behind it, and avoid “illegal”.
- Write every public text in English and Spanish. Spanish first on Bolivian and Peruvian channels, English first on international ones.
- Dates as 2026-10-27 in data, “27 October 2026” in prose. Keep sentences short and put the number first.

The identity follows the privacy design

These rules are not taste. They are the same promises the system makes in code, applied to every poster, slide and post.

1. Never show an identifiable migrant.
No faces, no documents, no children, no license plates, no photographs taken at a crossing without written consent and a reason that belongs to the story. When in doubt, show the place or the object (a bridge, a bus terminal, a shelter door), not the person.

2. Never plot a person.
No map with one dot per individual and no route drawn for one traveler. Maps show nodes and totals by municipality and month, nothing finer.

3. A protected cell is hollow, never zero.
If a figure is below ten, draw the hollow cell or the hatched bar and write n<10. Do not print 0 and do not hide the row.

4. Say what the number is.
Every count carries the label “recorded events” and its source. Every forecast carries its band. A line without a band is not published.

5. Credit the sources.
The Hub reuses figures from INE Bolivia, INEI, Migraciones, DIGEMIG, UNHCR, IOM, Chile’s PDI. Name them next to the figure, as the site does.

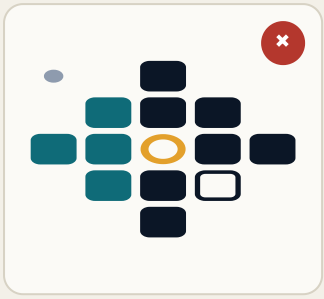

6. Be honest about the stage.
When a figure comes from a demonstration or an estimate, label it as such on the same slide.

Photography

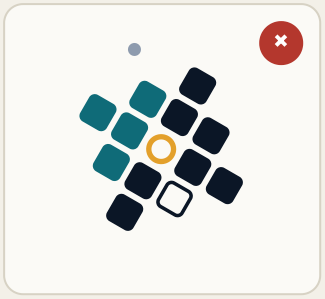

Landscape and infrastructure at altitude: the Desaguadero bridge, the El Alto skyline, Lake Titicaca, the Pisiga road. Natural light, no filters, no saturated color grading. Place text on a Noche panel, never directly on the picture.

7 · WHAT NOT TO DO

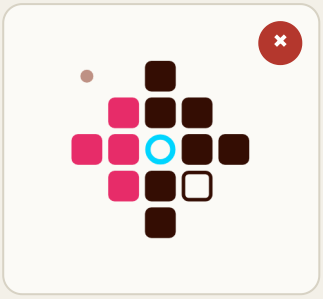

Eight ways to break the symbol

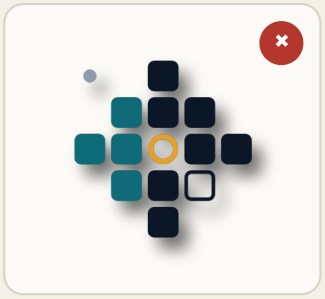

Do not stretch

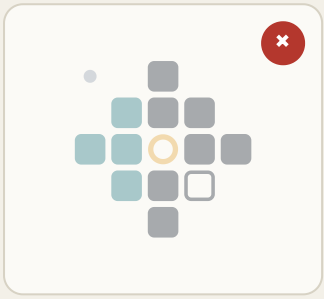

Do not rotate

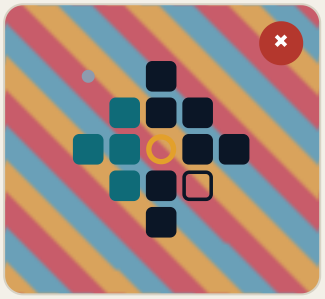

Do not recolor

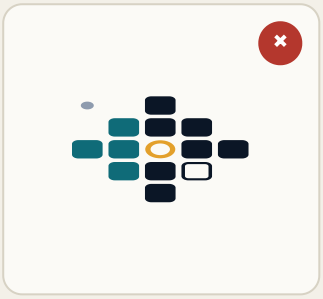

No shadows or glow

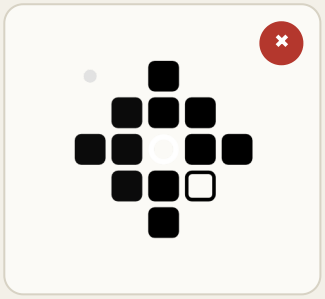

Do not fade it

Not on busy backgrounds

Do not squash it

Do not flatten the colors

Never

- Fill the hollow cell, or remove the ring or the open dot. They carry the meaning.
- Add cells, or arrange the twelve cells in a different shape. The open dot is the only element reserved for growth: when a new country joins, it becomes a cell and this guide is reissued.
- Retype ATMDH in another typeface, change its tracking, or separate it from the symbol in the lockups.
- Place the logo inside a circle or a badge of another organization's color.

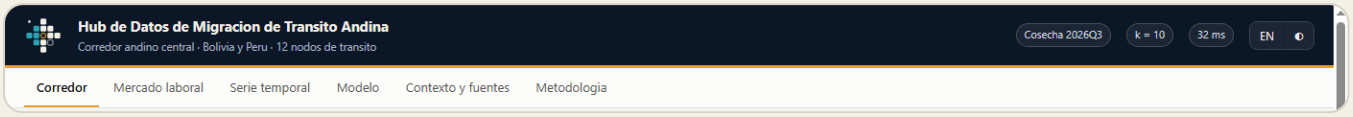

Partners

Next to the logos of other organizations, keep the ATMDH logo at the same optical height and respect its clear space. Do not imply endorsement: use the line "Developed in the Departmental Youth Council of Santa Cruz" only if the Council has agreed.

8 · IN USE

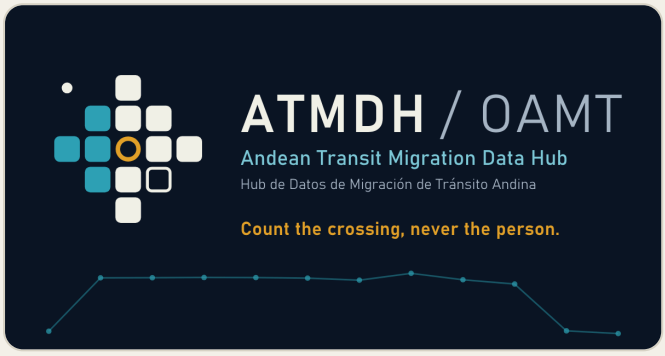

Website, preview card and files

Website header

Noche bar, reversed symbol at 40 px, ochre line below, Lago claro and Hielo for text. The selected tab carries the ochre underline.

Preview card

1200 × 630 px. It is the image that appears when the Hub link is shared.

Kit contents

SVG	symbol, horizontal, stacked, icon, 4 color versions
PNG	same set with transparent background, 1200 to 2400 px
Icon	1024 and 180 px, favicon.svg
Card	social card 1200 × 630
Guide	this document, PDF and web page

Web page: bookcubers2-ux.github.io/andean-transit-migration-data-hub/brand/

Using this identity in a co-branded post

1. Photo of the speaker or place on the left, text on a Noche panel on the right.
2. Horizontal logo, reversed, bottom left, with the clear space respected.
3. One ochre element only: the ring in the logo, or a single highlighted figure.
4. Caption in two languages, with the sources named.
